CAREER

Throughout my career as a front end developer, I've emphasized the importance of scaleable and well-documented code. I enjoy working collaboratively but can also run with projects on my own.

PROJECTS

Brand overflow (App) (Website)

Brand overflow is an All-in-One SEO Software it has many tools that help to optimize and rank your website.

Topicmojo (App)

Topicmojo analyses popular search engines like Google and discovers every useful phrase or question people are asking around your keyword.

SEO Mojo web extension (chrome web store)

SEO Mojo It's a simple plug n' play extension and gives you keyword volume, backlinks data

JustBogos (app store)

JustBogos is a React Native project that I build for the client. JustBogos is effortless to save money on groceries without having to clip coupons or search the weekly ads.
